Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

The management objective of the Fund is to achieve high income, over an investment period of 7 years from the launch date of the sub-fund.

The Fund mainly invests in government and corporate bonds of any credit quality from Asian Pacific countries, excluding Japan, that mature on or before 31 December 2023.

Specifically, the sub-fund invests up to 100% of its net assets in fixed and floating rate debt securities as well as in money market instruments that are issued in those countries. The sub-fund may also invest in debt securities issued in other countries. The sub-fund does not invest in securities that are distressed or defaulted at the time of investment. The sub-fund may hold securities that become distressed or defaulted.

The sub-fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated:

- convertible bonds: 30%
- equities (through exposure from convertible bonds): 10%
- distressed or defaulted securities: 10%
- other UCITS/UCIs: 10%

RISK AND REWARD PROFILE

Risk and Reward Profile: The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 4 because of investments in government and corporate bonds of any credit quality, and particularly in emerging markets.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.

- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

The Fund's modified duration may vary from 0 to 6 and decreases over time. The Fund may hold cash and cash equivalent on an ancillary basis. These may include monetary UCIs or UCIs whose investment's overall weighted maturity or rate reset frequency does not exceed 12 months.

The Fund may use derivatives as a substitute for direct investment, for hedging and for efficient portfolio management. The Fund may use, rates indexes, swaps, futures, forwards, NDF (Non Deliverable Forward), CDS (Credit Default Swap) single name.

The Fund may enter into temporary repurchase transactions and reverse repurchase transactions.

You can buy and sell shares of the Fund daily.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money before 31 December 2023.

The income generated by the share Class I USD distribution is distributed.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Counterparty risk: the Fund enters into contracts with various counterparties. If a counterparty does not fulfil its obligations to the Fund (e.g. not paying an agreed amount or not delivering securities as agreed) the Fund can suffer a loss.

Interest rate risk: an increase in interest rates may cause the value of fixed income securities held by the Fund to decline. Bonds prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

Derivative risk: the Fund uses derivatives. These are financial instruments whose values depend on the value of the underlying asset. Small price fluctuations in the underlying asset can result in large price changes in the derivative.

Liquidity risk: liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

📍 CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
